Advanced Procurement Portal (APP)
Solution Summary

US Federal Contractor Registration's (USFCR) Advanced Procurement Portal (APP) is a web-based contracting management platform designed for government contractors. With this easy-to-use platform, you can find opportunities with federal agencies, track prime contractor and contracting officer activity, and research your competition.

OPPORTUNITY SEARCH CHALLENGES

User Difficulty

Navigating government websites and resources can be challenging due to outdated design and functionality

Static Features

Updates and improvements on government-run sites are few and far between.

Site Crashes

Downtime and crashes on government websites are all too common, causing inconvenience and frustration for users.

Learning Curve

Businesses new to the federal marketplace might not know the proper steps to bidding on a federal contract.

INSIDE USFCR'S SOLUTION

With the APP, contractors can manage a wide array of vital government contracting tasks with one easy-to-use platform.

SEARCH
Find opportunities in your industry with ease.

SAVE
Save your search preferences to keep receiving relevant results.

AUTOMATE
Keep track of opportunities with updates emailed directly to you.

MANAGE
Keep track of contracting officer and subcontractor activity.

LEARN
Keep your skill set and knowledge sharp with the APP Learning Center.

RESEARCH
Find information on previously awarded contracts and your competitors.

BENEFITS

User Focused

At the core of APP's design is simplicity. Finding opportunities is as easy as using your favorite search engine.

Updates

With APP, you don't have to wait years for a much needed system update. New and helpful features are constantly being added.

Reliability

When government systems go down or are unavailable, you can rely on APP to keep running.

Learning Center

USFCR's learning center has tutorials walking clients through the steps of finding and bidding on contracts.
